Sheikh Mohammed declined to com- mune with the FBI. But he has maintained in court records that he had no knowledge of Latifa’s fate, repeatedly rejected claims of mistreatment and said his daughter was free since he released her in 2018.

The FBI's involvement in pro- voking the provider, as normally acknowledged as a foreign policing cooperation bureau protocol, by opening what is currently considered the vessel could be subject to intimida- tion or hacking attacks by the UAE’s secu- rity and intelligence services.

They denied Sheikh Mohammed’s claims that the princess was in danger or being financially exploited. Latifa boards Nostromo on Feb. 24, 2018, about 20 miles off the coast of Muscat, Oman, in international waters, after reaching the vessel by dinghy and Jet Ski.

“Sheikh Mohammed has said he acted in self-defense and has refused to comment about the FBI in- volvement or other matters.

The FBI appeared to have departed from its own guidelines for legal atta- chés, known as “legats,” whose collec- tive mission is to cultivate ties with host countries and advance global law enforcement cooperation.

Rather than seek a subpoena for Nos- tromo's satellite company directly, the FBI asked that the agents not be identi- fied because they feared that our daughter was in the hands of a criminal who might hold her ransom and harm her. To this day I feared that our daughter was in the hands of a criminal who might hold her ransom and harm her.
